EcoSoft **Collection Manager**

EcoSoft Collection Manager allows businesses to save time, reduce errors, enhance customer service and improve operational efficiency by delivering a range of benefits including:

- *More efficient processing of all regular and ad-hoc industrial and commercial waste collection and recycling details*

- *Easier recording of a wide range of services including front, rear and hook lift, bin delivery, pick up and changeover, liquid, recycling and equipment hire, servicing and cleaning.*

- *Simpler maintenance of collection schedule cycles including weekly, fortnightly, monthly, tri weekly, same day each month and ring ins*

- *More efficient fully automated calculation of prices including per unit, per meter, site, administration, fuel levy, flat and minimum fees*

- *Better operational control via automatic audit trails, detailed note entry and the ability to easily suspend and reinstate services*

- *Increased staff productivity via flexible quick look up reference features and comprehensive account monitoring, reconciliation, pre paid and billing in advance tools*

- *Improved customer service due to industry specific invoices*

- *Increased driver performance via detailed and accurate run sheets*

- *Faster and more accurate billing and KPI reporting via streamlined confirmation of amendments and processing of statistics*

- *Simplified access to vital run and service KPI reporting details via standard and 3rd party reporting tools*

- *Simple user interface allows easier training of new and temporary staff*

- *Locally designed and developed to suit the local industry*

- *Scalable system, easily expanded to fit different business sizes and budgets*

- *Software can be customised to suit specific requirements*

- *A reliable and effective business partner providing proven after sales support*
