

Ecosoft GPS Tracking Software - Version 2 Released

2nd November 2009

Version 2 of Ecosoft's popular GPS Tracking software has just been released!

New features include:

- The introduction of GPS Back Office.

Visit www.ecosoft.com.au/Residential/booverview.html for more information on Back Office.

- Full interactive vehicle activity history.

Select a vehicle to an activity list of all the positions and activities perform for the desired day. A handy time interval let's you select how much detail you wish to view right down to every 30 seconds!

- Click on a time in the activity list to take you to the exact location on the map.

- Introduction of Geo Fencing.

The ability to add geo fencing which enables you to mark areas of interest such as depots and waste disposal site to allow the GPS software to trigger events or provide additional reporting.

- New reports including:

- GPS – Tracking Report

A very flexible reporting tool that allows you view the activity information for vehicle ranges over date ranges with ability to filter on action types and locations. The information is displayed in either tabular form on the screen or in a convenient Excel format.

- Fleet Daily Activity Report

For all the vehicles in your fleet on any given day this reports provides you with all your essential operational information. Information at your finger tips include:

- Number of breaks
- Length of breaks
- Total Kilometres
- Collection Kilometres
- Number of bins collected
- Bins per Kilometre
- Bins per Hour

- Fleet Activity Summary Report

Similar to the Fleet Daily Activity Report but allows you to enter a date range.

- Vehicle Activity Summary Report

Similar to the Fleet Daily Activity Report but allows you to select a single vehicle over a date range.
